***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9, 10, 19, 20, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones (US 4,635,814) in view of Nichols (5,217,138). Regarding claims 20 and 21, Jones teaches a container with two fitments but does not teach the openings in the fitments as being different sizes. Nichols, as seen in Fig. 1 and 4, teaches a container with two fitments with a reducer bushing in the second opening. It would have been obvious to employ a reducing bushing in the second opening of Jones to accept a threaded vent means to further restrict the opening as taught by Nichols. Regarding claims 9 and 10, see Figs. 1 and 6 of Jones where the flange is 50 and the projection is 57 and 58 is the engagement structure. Both fitments have these features. Regarding claim 19 and 20, see Figs. 1 and 6 where the limitations are met.

***Response to Arguments***

Applicant's arguments with respect to claims 9, 10, and 19-22 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
